

Committee Member Correspondence

June 1, 2010

To CSA O86 Members

Re: Dr. Carl Wilson

I am very sad to advise committee and sub-committee members that past-chair of CSA-O86, Dr. Carl Wilson passed away in hospital in Vancouver last evening.

Carl has been an incredibly sensitive and astute champion for what became, under his direction, the respected Wood Design Standard that it is.

His unique contributions in so many areas of standards and industry policy will be missed, but the good spirited encouragement that he contributed to all of us remains as a valued legacy, and an example I know we each will want to follow.

I will further advise of funeral and memorial service arrangements as they become known.

We are indeed grateful for the opportunity we have all had to share in Carl's life.

Respectfully,

Gary Williams,
Chair, Technical Committee, CSA O86.14
